

ASHWIN RAMAN

New York, NY | (949) 419-7081 | ashwinraman1990@gmail.com

TECHNICAL SKILLS

Languages Java, Go, Scala, Python, SQL

Frameworks & Tools Kafka, Spark, Akka, Airflow, Spring, GraphQL, Elasticsearch

Databases MySQL, PostgreSQL, Amazon Redshift, Elasticsearch

Cloud & Infra AWS, Docker, CI/CD Pipelines

EXPERIENCE

Staff Software Engineer

Apr 2024 – Dec 2025

Axon Inc, New York

- Led the design, development, and implementation of features for the Axon Records Management System (RMS) using Go, Kafka, MySQL, GraphQL, and Elasticsearch
- Drove the Multi-Jurisdiction Data Sharing initiative, enabling cross-agency search and data retrieval across law enforcement consortiums with role-based access control, partner-aware caching, and Elasticsearch multi-index queries
- Migrated task workflow engine to Elasticsearch, implementing noisy-neighbor isolation and index optimizations that improved query throughput and system reliability

Staff Software Engineer, Search Backend

Sep 2020 – Feb 2024

eBay Inc, New York

- Built large-scale search ranking algorithms processing multi-terabyte datasets using Java, Scala, Kafka, Spark, and Airflow for classification, text mining, and information retrieval
- Led the Great Price and Best Selling badge features, directly visible on search results, increasing average conversion rate by 14%; badges computed in near real-time from sales history, impressions, and engagement signals
- Designed and shipped Rapid Feature Management, reducing ML ranking model feature development-to-production cycle time by 60%

Principal Software Engineer, Data Preparation

Aug 2017 – Sep 2020

Dell Boomi, San Francisco

- Built enterprise ETL solutions on the data preparation platform using Scala, Akka, Spark, Python, and PostgreSQL for Fortune 500 customers
- Designed real-time data pipeline ingesting and processing 150M+ raw records from heterogeneous sources via Apache Kafka and Spark
- Developed a universal parser for structured and semi-structured data (XML, JSON, CSV) with automatic flattening to columnar storage format

Software Development Engineer

Apr 2016 – Jun 2017

Informatica Corporation, Redwood City

- Built dynamic target creator enabling schema-agnostic data writes to Amazon Redshift, relational databases, Salesforce, and flat files
- Optimized data grid performance for 100K+ record datasets using materialized views and batch-subset processing

Senior Software Engineer

Jul 2011 – Aug 2014

Parametric Technology Corporation (PTC), India

- Migrated legacy architecture to Spring Framework; built drill-down filters, chart APIs, and reusable grid components adopted across product lines
- Led development of Approval Workflow and Pricing modules for BMW's product lifecycle management platform

EDUCATION

M.S. Computer Engineering

2016 | GPA: 3.75 / 4.0

University of California, Irvine

B.Tech Computer Science & Engineering

2011

Bharati Vidyapeeth's College of Engineering, India
